

Project Development Phase

Sprint -1(Python Script)

Date	29 October 2022
Team ID	PNT2022TMID37064
Project Name	Project – Personal Assistance for Seniors Who Are Self-Reliant

Description

The Medicine details are generated and automation has been implemented through the python code instead of using hardware to implement medicine reminder system to elders. And the python code need to upload the data in IBM cloud.

Python Code

```
